

## \_\_\_ Description of **The AAA Hammer**

The AAA Hammer is a percussion hand tool used for hammering nails. This tool is designed only for hammering nails. It isn't suitable for breaking something or anything else. Efficiency is achieved due to the modular design. It is possible to install a variety of options for hammer heads and handles. All heads and handles have the same interface for connection. It allows you to combine modules based on the situation.

## \_\_\_ Description of **nails**

A fastening product, which is a cylinder, cone, parallelepiped, pyramid or screw, pointed at one end and having a flat grooved or decorative cap at the second, blunt end. It is used to fasten various materials by hammering. The length of nails varies from 8.0 to 50.0 mm.
